After any 2016 taxonomy is accepted by EDGAR, the staff will notify the public of when EDGAR will no longer accept the taxonomy with a strike-through in the table above. Taxonomies without a strike-through will continue to be accepted (the rocr taxonomy is not and has never been accepted by EDGAR).

Note that the taxonomies are independent of one another; the following are exceptions:

- Some rr-2010 linkbases refer to the dei-2009 schema (not hosted at xbrl.sec.gov).
- Some rr-2012 linkbases refer to the dei-2012 schema.

## 1.1 Locations of taxonomies

The main schema file of each final version, having short name {name} can be found at this location:

**<http://xbrl.sec.gov/{name}/{yyyy}/{name}-{yyyy-mm-dd}.xsd>**

For example, <http://xbrl.sec.gov/rr/2012/rr-2012-01-31.xsd>

The final zip archive of each can be found at:

## 2 Element changes and Deprecated Elements

Detail about the date, reasons, and relationships between deprecated elements and their replacements are found in the taxonomy entry points having the token **-ent-dep-** or **-entire-** in them. The arc roles

and label roles are those used in the US-GAAP taxonomy. For example, to see all information about deprecated elements in the currency taxonomy, see the entry point:
